

Peter Claeysens

Senior Advisor

Peter Claeysens is currently responsible for the strategic and support services of the Belgian Federal Department of Transport.

Peter joined the Department of Transport in 1997 as a naval engineer and policy advisor within the Maritime Transport Directorate where he was responsible and a representative for the Belgian policy in shipping safety and environment protection issues. Peter was acting director-general of the Maritime Transport Directorate in 2014.

Prior to joining the department of Transport, Peter was a researcher and project engineer with the Flanders Hydraulics Research Institute where he was in charge of the towing tank for manoeuvres in shallow water and ship modelling.

Peter holds a degree of Naval engineering from the University of Ghent.
