Chapter 1

1. Themes and Tables

INTRODUCTION

This report provides a picture of the world's merchant fleet in 2012, derived from data contained in the Equasis database. It examines the structure and characteristics of the fleet and its performance. The statistics are grouped into themes which could be of interest to the industry and regulators.

The themes are as follows:

1. The Merchant Fleet Population
2. Classification Societies
3. P&I
4. Port State Control
5. Vetting Programmes and Trade Associations

OVERVIEW

Equasis is populated with data from most of the world's merchant ships. Basic ship particulars are derived from the commercial database of IHS Fairplay.

From a commercial and regulatory point of view, size and type of ship are two key criteria and therefore throughout this report the statistical analysis is based on these two elements. For the "Port State Control" theme, ships will be divided into ship type categories derived from PSC databases.

SIZE

By size ships are grouped into four categories:

1. Small ships 100 GT to 499 GT
2. Medium ships 500 GT to 24.999 GT
3. Large ships 25.000 GT to 59.999 GT
4. Very Large ships ≥ 60.000 GT

The small ships size category reflects the main tonnage threshold for merchant ships to comply with the SOLAS Convention. This category also includes many ships which do not trade internationally and therefore are not

covered by the International Conventions or the port State Control regimes. A significant proportion of these vessels are also too small to be covered by classification societies and the vetting and trading organisations. They have, therefore, been excluded from most of the analysis in order to avoid distortion of the totals for ships which are generally covered by the International Legislation, port State Control, classification societies and other trade organisations. To provide data for the whole fleet, small ships are included in Chapters 2.1 and 2.2, and in the multiple inspection figures in Chapters 5.1 and 5.6. Small ships are also taken into consideration when evaluating the fleet size of a company and the detention rate in Chapter 6.3.

Regulatory and commercial tonnage thresholds are not common to all ship types. As a compromise, categories medium, large and very-large (ie: 2, 3 and 4) have been chosen so as to divide the fleet into three approximately equal parts in terms of tonnage. These three together represent the larger worldwide trading ships.

SHIP TYPES

Equasis uses over 100 descriptions of ship type provided by IHS Fairplay. For this report these types have been aggregated into 12 main types as follows:

- General Cargo Ships
- Specialized Cargo Ships
- Container Ships
- Ro-Ro Cargo Ships
- Bulk Carriers
- Oil and Chemical Tankers
- Gas Tankers
- Other Tankers
- Passenger Ships
- Offshore Vessels
- Service Ships
- Tugs

Annex I outlines how this aggregation has been accomplished. This Annex is regularly reviewed to include new ship types that were excluded in the previous versions of the Statistics but should now be included, to better reflect the situation of the world merchant fleet.

PSC SHIP TYPES

PSC organisations are now using specific ship type categories that are different from the ones used by IHS Fairplay. From 2011 onward, these categories have been used in Chapter 5 for ship types.

For ships that have never been inspected or when the ship type is not reported in the PSC data provided to Equasis, it is not possible to attribute a "PSC ship type" easily. In this situation, a "default PSC ship type" is used in substitution of a genuine PSC ship type.

This default PSC ship type is based on the ship type as provided by IHS Fairplay. Annex III provides the aggregation used for this purpose. This Annex was established mainly through statistical analysis and direct comparisons between IHS Fairplay ship types and PSC ship types. It cannot be directly compared to Annex I as the intention is not to create categories of ships, but to attribute a PSC ship type to ships that were not inspected.

FLAG STATES

Flag States (under which ships are registered) are grouped in two categories, "targeted" and "non-targeted". Those in the "targeted" group are the flag States which appear on at least one of the targeted lists of the Paris Memorandum of Understanding (MoU) [Black List], the Tokyo MoU [Black List] and the USCG [safety targeting]. Indian Ocean MoU (IO MoU) and Viña del Mar (VDM) also provide their inspection results to Equasis, but they do not use a targeted list.

The lists are published annually and reflect the safety performance of ships registered to each flag State as measured by the number of port State inspections and detentions recorded over a three-year period.

It is possible for a flag State to be "targeted" in one regime but not in

another. This can be because its safety performance varies from one regime to another, or, because few, or none, of its ships trade to ports covered by a particular MoU.

Further details are included in the list of the respective regimes' port State Control Annual Reports. The list of targeted flag States, based on the 2012 annual reports of the Paris MoU, the Tokyo MoU and the US Coast Guard, can be found in Annex II.

SOURCE OF INFORMATION

Equasis is fed by 45 data providers which can be divided into six categories: core ship and company data, PSC regimes, classification societies, P&I clubs, associations or vetting programs and other international organisations. Almost all these sources are used in this document to a greater or lesser extent.

As to PSC information, it should be noted that not all inspections within the Indian Ocean MoU are reported in Equasis. Only inspections from Australia, India, Iran, South Africa, Sri-Lanka and Mauritius are considered in these statistics. In 2012, these six countries represented about 90% of all inspections carried out within the Indian Ocean MoU.

The Viña del Mar agreement is also providing data to Equasis since mid-2011. Therefore, inspections from the 1st of January 2012. have been integrated into this report

Chapter 2

2. The Merchant Fleet Population

INTRODUCTION

The tables in this chapter provide a picture of the fleet of ships in Equasis in terms of type, size, age and the flag under which the ship is registered.

RESULTS

Graph 1 shows that by number, the Equasis fleet is dominated (82%) by small and medium sized ships up to 24.999 GT. Small ships alone represent 36% by number, although only 1% by tonnage. Many of the small ships are not subject to international conventions on safety and pollution prevention because of their size or because they do not trade internationally. However some flag States do require these vessels to apply the same standards

General cargo ships are the most common type by number, at 20.2%, of the Equasis fleet. However, most of these are small and medium-sized. In the large and very large categories, oil and chemical tankers and bulk carriers represent well over half of the fleet by number.

In terms of tonnage, the large and very large size categories represent 79% of the Equasis fleet (Graph 2), with oil and chemical tankers and bulk carriers dominating both categories at 67.7% (large) and 65.1% (very large) respectively.

Table 3 shows that just over a half (51.4%) of the Equasis fleet, by number, is 15 years or older. However, this is due largely to the dominance of older ships in the small and medium ship size categories. The trend is reversed in the large and very large ship size categories, where 79.8% (large) and 86.2% (very large) are less than 15 years old.

Graph 4 shows that the most modern fleets correspond to the biggest ships in

tonnage. Looking back at the statistics of the previous years, it is clear that the younger ships are bigger than their predecessors. This trend continues each year. The statistics show that the biggest ships are recent additions to the fleet.

Graph 13 shows that about a third (36%) of the total number of ships are associated with a targeted flag State. Whilst graphs 15 to 20 show that the proportion of ships under a targeted flag State decrease with size: 37% for the medium size ship size category, 33% for the large category and 29% for the very large. The figures are very close with respect to number and tonnage.

Tables 13 and 14 both show that for the targeted flag States, General Cargo ships are the most inspected ship category by number (31.9%) but Bulk Carriers are the most inspected ship category by tonnage (43.2%). It is natural considering that those two ship categories are also the biggest with respect to the total number of ships and tonnage, all be it with smaller proportions (23.3% and 34.5% respectively).

This is the opposite for Offshore Vessels, Container Ships and Oil & Chemical Tankers which tend to have a larger proportion of inspections originating from non-targeted flag States.

Chapter 3

3. Classification Societies

INTRODUCTION

Classification Societies provide technical and surveying services for the shipping industry and the flag States. On the one hand, they survey the ship on behalf of the owner and issue a 'class certificate' for the ship. On the other hand, they may be mandated by flag States to undertake statutory surveys on their behalf as *Recognised Organisations*. The main classification societies worldwide are members of the International Association of Classification Societies (IACS).

This chapter and all other tables and graphs dealing with Classification Societies in this publication, with the exception of Chapters 5.5 and 5.6, only refer to the 'class' function; they only indicate the society that issue the class certificates for a particular ship. It does not necessarily follow that the same society is also acting as a Recognised Organisation on behalf of the ship's flag State.

In 2012, IACS consisted of 13 member societies:

- American Bureau of Shipping (ABS)
- Bureau Veritas (BV)
- China Classification Society (CCS)
- Croatian Register of Shipping (CRS)
- Det Norske Veritas (DNV)
- Germanischer Lloyd (GL)
- Indian Register of Shipping (IRS)
- Korean Register of Shipping (KR)
- Lloyd's Register of Shipping (LR)
- Nippon Kaiji Kyokai (NK)
- Polish Register of Shipping (PRS)
- Registro Italiano Navale (RINA)
- Russian Maritime Register of Shipping (RS)

The tables in this chapter show the proportion of the Equasis fleet $GT \geq 500$, in each ship size category and ship type, which were classed with members of IACS and those classed with Classification

Societies which were not members of IACS. Data on class comes from IACS members, and for non-IACS Classification Societies the information is supplied by IHS Fairplay when available.

There are about 8,757 ships for which no classification data is available at all in Equasis. This equates to a tonnage of 17,124,000 tons, which represents 11% by number and 2% by tonnage of the entire fleet. When considering only ships above 500GT, the figures drop to 3,856 ships, representing a tonnage of 15,888 tons (8% and 1% respectively). They are mainly small tugs and small to medium general cargo ships. For simplicity reasons, but also because the IACS Classification Societies provide their data directly to Equasis (ie: absence of information means they are not classed by IACS), these ships are grouped with non-IACS ships under the heading "Non-IACS/No Record".

In chapter 3.3 the fleet is analysed according to class and flag State status. Flag States are grouped in two categories, targeted and non-targeted, as explained in Chapter 1.

In Chapter 3.4 the detention rate of ships is the ratio between the number of detentions and the number of inspections in the Paris MoU, Tokyo MoU, Indian Ocean MoU (IO MoU) and USCG regions in 2012. All detentions are taken into account, irrespective of whether or not the deficiencies giving rise to the detention were indicated by PSC as being related to the activities of the Classification Society/Recognised Organisation.

RESULTS

Graph 21 shows that the Equasis fleet over 500 GT is dominated by ships classed by IACS members (77% by number and 96% by tonnage).

This proportion is reflected in most of the ship types although general cargo ships account for just under half (43.3%) of the world's fleet over 500GT that are not IACS classed (Table 21). Graphs 23 to 28 show that the IACS share increases with the size of the ship, with 98% and 99.6% of the large and very large ship size category, by number and tonnage, being classified by IACS members. Ships covered by non-IACS members are almost all medium sized (Tables 23, 25, 27).

Graphs 29, 37, 45 and 53 show that the IACS members coverage is greater among the younger fleet and tends to diminish with age – from 92% of ships aged up to 5 years to 45% of the fleet over 25 years old.

The safety performance of the Equasis fleet over 500 GT, as measured by detention rate, shows that 3.4% of inspections resulted in detention in 2012. Those ships using a Class Society that is a member of IACS were less likely to be detained in 2012 (2.67%) than those classed with non-IACS members or with no recorded class (11.04%).

The number of inspections on vessels in the large and very large ship size category with a non-IACS class or no recorded class is too small to be statistically significant, and the 0% detention rate for these categories is meaningless. This is because it is based on only 46 inspections on 18 different ships for the large ship size category and 14 inspections on 8 different ships for the very large size category (to be compared to 5351 inspections on 1894 ships for the medium ship size category of ships with non-IACS or no recorded class).

Chapter 4

4. P&I

INTRODUCTION

Protection and Indemnity (P&I) Clubs provide third-party insurance cover to ship owners. Members of the International Group of P&I Clubs (IGP&I) provide Equasis with information on all vessels using their clubs which have IMO numbers.

There are thirteen separate and independent principal Clubs in the IGP&I. Some of the Clubs have affiliated and reinsured subsidiary associations:

- *American Steamship Owners Mutual Protection and Indemnity Association, Inc*
- *Assuranceforeningen Skuld*
- *Gard P&I (Bermuda) Ltd.*¹
- *The Britannia Steam Ship Insurance Association Limited*
- *The Japan Ship Owners' Mutual Protection & Indemnity Association*
- *The London Steam-Ship Owners' Mutual Insurance Association Limited*
- *The North of England Protecting & Indemnity Association Limited*
- *The Shipowners' Mutual Protection & Indemnity Association (Luxembourg)*
- *The Standard Steamship Owners' Protection & Indemnity Association (Bermuda) Limited*²

- *The Steamship Mutual Underwriting Association (Bermuda) Limited*
- *The Swedish Club*
- *United Kingdom Mutual Steam Ship Assurance Association (Bermuda) Limited*
- *The West of England Ship Owners Mutual Insurance Association (Luxembourg)*

It should be noted that there is a significant number of small ships of less than 100GT entered in the IGP&I data but as explained in Chapter 1, small ships are not included in the statistics which follow.

The following Tables show the proportion of the fleet, in each ship size category and ship type, which is registered with the clubs in the IGP&I (column headed IGP&I), compared to the proportion of ships (column headed Non IGP&I) which are either:

- insured with a club which is not a member of the IGP&I ;
- covered by commercial insurance for which information is unavailable ;
- not covered by P&I insurance.

In chapter 4.4 the fleet is analysed according to P&I and flag State status. Flag States are grouped in two categories, targeted and non-targeted, as explained in Chapter 1.

In Chapter 4.5 the detention rate of ships is the ratio between the number of detentions and the number of inspections in the Paris MoU, Tokyo MoU, Indian Ocean MoU (IO MoU) and USCG regions.

RESULTS

Graph 69 indicates that for vessels over 500GT in Equasis, for which data has been supplied, 62% are covered by one of the

¹ Gard (Bermuda) Ltd only became a principal Association with effect from the 2010 policy year. Previously, the principal Association was Assuranceforeningen Gard.

² Since July 2012, "the Standard Steamship Owners Protection & Indemnity Association (Bermuda) Ltd" has changed its name to "The Standard Club Limited"

members of the IGP&I. This rises to 92% by tonnage.

Graphs 71 to 76 show that 95% of the large and 98% of the very large ship size categories are covered by the members of the IGP&I. Within the medium ship size category just under a half (48%) are covered by number, which equates to about 71% in tonnage.

Comparing Graph 77 with Graph 85 reveals that the age profile of ships covered by the members of the IGP&I is considerably younger than those which are not. A third (37%) of the IGP&I fleet is under 5 years old and only 10% is over 25 years old. Of the younger fleet, more than half are either chemical tankers or bulk carriers (Table 81). This trend is more marked in the large and very large ship size categories. For non-IGP&I members the trend is reversed, as only 14% of the fleet is under 5 years old and 51% is over 25 years old, with 43.5% of the older fleet being general cargo ships (Table 89).

The safety performance of vessels over 500GT that are included in Equasis, as measured by detention rates, shows that 3.4% of inspections resulted in detention in 2012. Table 105 shows that ships insured by companies outside the IGP&I had a higher detention rate in 2012 than those that are members (8.01% compared with 2.35%).

The number of inspections on ships in the very large ship size category and covered by non-IGP&I members is too small to be statistically significant and the 0% detention rate for this category is meaningless, as it is based on only 65 inspections on 44 different ships.

4.1. P&I STATUS

Chapter 5

5. Port State Control

INTRODUCTION

Port State Control authorities check the compliance with International Conventions of foreign ships visiting their ports. Equasis includes inspection data provided by four of the regional Port State Control regimes, Paris MoU, Tokyo MoU, Indian Ocean MoU (IO MoU) and U.S. Coast Guard (USCG). The following tables show the level of annual inspections by these regimes.

Viña del Mar has joined Equasis in 2012 and the data from that region is reflected in Statistics for the year 2012 only. Therefore, in the tables and graphs that include inspections over the last 3 years (2010-2012), only include data from Viña del Mar. in the figures for 2012

PSC SHIP TYPE

As explained in Chapter 1, this chapter has been revised in 2011 to use the PSC ship types employed during inspections, instead of the generic and commercial ship types used in the other chapters.

It needs to be noted that, for consistency reasons, the fleet considered is exactly the same as that used in other chapters. It means that some inspections are not counted in this chapter if the ship is not active anymore or if the ship has a "commercial" ship type that is considered to be out of the scope of these statistics.

INSPECTED SHIPS

Ships are subject to port State Control inspections in most parts of the world, but Equasis received data only from five PSC regimes. Some ships do not trade to the participating maritime authorities of these five MoU's or in some cases have not been inspected when they have visited them. In addition, some ships are not eligible for PSC inspections either because of their size or type, or they are only engaged in

domestic trade. However, these vessels are mainly confined to the small ship size category. Therefore, there is a portion of the eligible fleet without a port State Control inspection record in Equasis.

A significant portion of this "without inspection record" fleet, particularly those in the very large, large and medium ship size category, could potentially be trading in the waters of these PSC regimes or are trading using ports in these areas. The inspection figures show the proportion of the fleet which have been inspected by one of the four PSC regimes in the last 3 years and in 2012 for Viña del Mar. Therefore the proportion of fleet that have not been inspected can be calculated. The figures are sorted by size and PSC type with details per age ranges, flag State and P&I coverage.

RECOGNISED ORGANISATIONS

Information on the "Recognised Organisations" used by vessels are now included in this chapter. The data used is based on the statutory certificates recorded at the time of inspection. Recognised Organisations are Class Societies working on behalf of a flag state to survey ships under their flag and certify that they comply with the relevant international conventions.

In Equasis, information about Recognised Organisations is provided through PSC inspections. However, only the Paris MoU and the Indian MoU provide this information to Equasis.

Table 142 provides the total number of inspections in which a statutory certificate has been recorded by the Port State Control Officer (PSCO) for each type of certificate. It also specifies the number of inspections where this certificate has been recorded by the PSCO by issuer (flag State or RO).

Please, note that during an inspection, several certificates are usually checked. Additionally a "group" of certificates in the table may refer to more than one certificate and each may be issued by different authorities. For these reasons, total figures cannot be easily deducted by summing lines or columns in Table 142

The list of certificates by group is given in Annex IV. The group "Other" covers all unlisted certificates.

RESULTS

Table 114 reveals that of the 50,628 ships over 500GT in the fleet covered by Equasis, 65% (32673) were inspected at least once in the period 2010-2012. This equates to 88% by tonnage. Tables 111 and 112 show that this proportion is 56% in 2012 (28473).

Table 111 shows that the number of individual ships inspected increased steadily in the period 2002 to 2011, with a small decrease in 2012. The number of individual ships increased in 2011, due to the new Inspection Regime in the Paris MoU region.

Regionally, Table 112 and Graph 104 indicate that in 2012 there was a greater tendency towards multiple inspections of ships in the Tokyo MoU region than in the other regions. In contrast, in the Paris MoU, 80% of the inspections are undertaken on different ships. This can be explained by the new inspection regime in place in the Paris MoU region which targets priority ships that have not been inspected for a certain time (6 months, one year or two years depending on the situation of each ship).

Tables 109 and 110 show that the majority of ships without an inspection record are in the small or medium ship size category (97% in number).

By age, Table 114 shows that older ships have been subjected to fewer inspections than newer ships. Additionally ships with IGP&I coverage have also been subjected to more inspections. The explanation for this is not evident, but a possibility would be that the majority of old ships and ships not covered by IGP&I are not operating in

the regions for which Equasis has PSC data.

Table 130 shows that, as expected, ships with targeted flag States are subjected to more inspections than those of non-targeted flag States .

Table 138 shows that issuers of statutory certificates are, in majority, Recognised Organisations that are member of IACS. About 96% of the inspections of ships over 500GT have at least one statutory certificate issued by a Recognised Organisation that is member of IACS.

Table 142 shows that the involvement of flag States differs greatly depending on the statutory certificates. The Minimum Safe Manning Document (SOLAS/STCW), the Continuous Synopsis Record (SOLAS/CSR) and the Bunkering Certificate are the statutory certificates that are, in majority, issued by the flag State. Flag States are also more involved in issuing the ISPS (that ensures security on ships), especially those that are targeted by PSC. Finally, Flag States are more involved in SOLAS requirements while Recognised Organisations are heavily involved in MARPOL certificates.

Chapter 6

6. Trade Associations and Industry Vetting Programmes

INTRODUCTION

Several professional maritime trade associations and industry vetting programmes supply information to Equasis on ships covered by their schemes. Such schemes are either company-based or ship-based. The company-based schemes (e.g. Intertanko) relate to certain ship types and aim to provide a mark of quality for ships covered by them. The ship-based schemes (e.g. OCIMF) provide industry inspection reports.

For each relevant ship type and size category the tables in Chapter 6.1 show the proportion of the fleet covered by each of the schemes which provide information to Equasis.

The ship types covered by each scheme are detailed in Annex V.

The tables in Chapter 6.2 show the detention rates of ships covered by each of the schemes compared with ships of the same type that are outside these schemes.

Shipping Companies

For each ship, Equasis records the company that provides the operational management either;

- a) under third-party contract; or
- b) managing ships owned by itself or its associated companies.

In most cases the company shown in the database is responsible for the operation of the ship and the duties and responsibilities imposed by the International Safety Management Code (ISM Code). The Code applies to

passenger ships and other ships of 500 GT or more, trading internationally.

The tables in Chapter 6.3 show the makeup of the fleet of ships in Equasis according to company fleet size, as measured by the number of ships over 100GT they operate. The tables also show the detention rates of ships over 500GT in each fleet size category.

The detention rate is the ratio between the number of detentions and the number of inspections in the Paris MOU, Tokyo MOU, Indian Ocean MoU (IO MoU), USCG and Viña del Mar regions in 2012.

RESULTS

Table 143 indicates that the majority of ships are not covered by the trade associations and/or industry vetting programmes providing data to Equasis, with the exception of OCIMF that covers about 66% of the total ships of the relevant categories (see annex V) and about 91% in tonnage.

Tables 143 to 148 suggest that ships in the medium, large and very large size categories that are covered by one of the trade associations and industry vetting programs are inspected more frequently in the five regimes providing data to Equasis than those ships not covered. For example, ships in the large ship size category, that fall into the targeted ship types who are members of Intertanko (see Annex V), were each inspected on average 1.64 times (2088 inspections of 1272 ships), compared with 1.22 times (1435 inspections of 1173 ships) for the ships who are not Intertanko members.

However, the same tables indicate that ships who are members of a trade association or industry vetting programme were detained less often than those that

were not members. For example the detention rate of Intertanko ships in the large ship size category was 1.0% compared with 1.5% for those who are not members (and of the targeted ship types as described in Annex V). It is a similar picture for ships that are members of Intercargo, Green Award, CDI and OCIMF.

Table 149 shows that just over a half (51.5%) of the companies included in the data collected by Equasis operate just one ship. Over 84% operate five or fewer, although these companies account for 30.5% of the fleet over 500GT by number.

Graph 139 reveals that ships operated by larger companies had a much lower detention rate than those operated by smaller companies. For ships in companies with more than 100 ships the detention rate is below 2.5% while one-ship and two-ship companies had rates of 7.26% and 5.61% respectively.

Annexes

Annex I. Ship type aggregations

The 13th category "Other" is not considered in the scope of these statistics and only given for information, it contains active ships not falling into one of the 12 main categories.

Modifications since last year are marked in bold.

General Cargo Ships

Deck Cargo Ship
General Cargo Ship
Palletized Cargo Ship
Passenger/General Cargo Ship
Refrigerated Cargo Ship

Specialized Cargo Ships

Barge Carrier
Heavy Load Carrier
Livestock Carrier
Nuclear Fuel Carrier

Container Ships

Container Ship
Passenger/Container Ship

Ro-Ro Cargo Ships

Container Ro-Ro Cargo Ship
Ro-Ro Cargo Ship
Vehicles Carrier

Bulk Carriers

Aggregates Carrier
Bulk Carrier
Bulk Dry Storage Ship
Bulk/Oil Carrier
Cement Carrier
Limestone Carrier
Ore Carrier
Ore/Oil Carrier
Powder Carrier
Refined Sugar Carrier
Self-Discharging Bulk Carrier
Wood Chips Carrier

Oil and Chemical Tankers

Chemical Tanker
Chemical/Oil Products Tanker
Crude Oil Tanker
Oil Products Tanker

Gas Tankers

CO₂ Tanker
LNG Tanker
LPG Tanker

Other Tankers

Asphalt/Bitumen Tanker
Bunkering Tanker
Caprolactam Tanker
Edible Oil Tanker
Fruit Juice Tanker
Latex Tanker
Molasses Tanker
Oil-Sludge Tanker
Vegetable Oil Tanker
Water Tanker
Wine Tanker

Passenger Ships

Accom. Offshore Supp. Vessel
Passenger (Cruise) Ship
Passenger Ship
Passenger/Landing Craft
Passenger/Ro-Ro Cargo Ship

Offshore Vessels

Drilling Ship
FSO, Oil
Mining Vessel
Offshore Processing Ship
Offshore Supply Ship
Offshore Support Vessel
Offshore Tug/Supply Ship
Pipe Burying Vessel
Pipe-Layer
Production Testing Vessel
Standby-Safety Vessel
Supply Vessel
Well-Stimulation Vessel

Service Ships

Buoy/Lighthouse Vessel
Cable-Layer
Crane Ship
Dredger
Fire-Fighting Vessel
Hopper Dredger
Hospital Vessel
Icebreaker
Kelp Dredger
Patrol Vessel
Pilot Vessel
Pollution Control Vessel
Power Station Vessel
Research Vessel
Salvage Ship
Search & Rescue Vessel
Tank-Cleaning Vessel
Training Ship
Trans-shipment Vessel
Utility Vessel
Waste Disposal Vessel
Work/Repair Vessel

Tugs

Pusher Tug
Tug

Other (Out of the scope)

Anchor Hoy
Coal/Oil Mixture Tanker
Crewboat
Exhibition Vessel
Fish Carrier
Fish Factory Ship
Fishing Support Vessel
Fishing Vessel
Landing Craft
Launch (unspecified)
Live-Fish Carrier
Mooring Vessel
Motor Hopper
Pearl Shells Carrier
Sail Training Ship
Sailing Vessel
Seal-Catcher
Trenching Support Vessel
Unknown
Urea Carrier
Vessel (function unknown)
Whale-Catcher

Annex II. Targeted Flag States 2012

The list of targeted flag is based on the 2012 annual reports of the Paris MoU, the Tokyo MoU and the US Coast Guards, published in 2013.

A

Albania
Antigua and Barbuda

B

Bangladesh
Belize
Bolivia

C

Cambodia
Comoros
Cyprus

D

Dominica

E

Egypt

G

Georgia

H

Honduras

I

Indonesia
Italy

K

Kiribati
Korea Democratic Republic

L

Lebanon
Libya
Lithuania

M

Malta
Mexico
Moldovia
Mongolia

N

New Zealand

P

Panama
Papua New Guinea
Peru

S

Sierra leone
St Vincent and Grenadines
St.Kitts and Nevis

T

Tanzania
Thailand
Togo
Tonga
Tuvalu

V

Vietnam

Annex III. Default PSC Ship types

Ship types in red corresponds to ship types that are not in the scope of these statistics (or for which no active ship is yet in the world fleet) but for which some PSC inspections have been carried out.

Although similar in the layout, this Annex cannot be compared to Annex I as the intention is not to create categories of ships, the purpose of this annex is only to attribute a PSC ship type to ships that were not inspected.

General Cargo/Multipurpose

Aggregates Carrier
Barge Carrier
Bulk Dry Storage Ship
Cement Carrier
Deck Cargo Ship
General Cargo Ship
Landing Craft
Latex Tanker
Limestone Carrier
Nuclear Fuel Carrier
Palletised Cargo Ship
Passenger/Landing Craft
Refined Sugar Carrier
Trenching Support Vessel

Refrigerated Cargo

Fish Carrier
Fish Factory Ship
Fruit Juice Tanker
Refrigerated Cargo Ship

Heavy load

Heavy Load Carrier

Container

Container Ship

Ro-Ro cargo

Container Ro-Ro Cargo Ship
Ro-Ro Cargo Ship

Bulk Carrier

Bulk Carrier
Ore Carrier
Self-Discharging Bulk Carrier

Oil tanker

Asphalt/Bitumen Tanker
Bunkering Tanker
Crude Oil Tanker
FSO, Oil
Oil Products Tanker
Water Tanker

Chemical tanker

Chemical Tanker
Chemical/Oil Products Tanker
Vegetable Oil Tanker

Combination carrier

Bulk/Oil Carrier
Coal/Oil Mixture Tanker
Ore/Oil Carrier

Gas carrier

CO2 Tanker
LNG Tanker
LPG Tanker

NLS Tanker

Molasses Tanker
Production Testing Vessel
Wine Tanker

High speed passenger craft

None

Passenger Ship

Passenger (Cruise) Ship
Passenger Ship
Sailing Vessel

RoRo passenger ship

Accommod. Offshore Supp Vessel
Passenger/Ro-Ro Cargo Ship

Offshore supply

Offshore Supply Ship
Offshore Support Vessel
Offshore Tug/Supply Ship
Pipe-Layer
Well-Stimulation Vessel

Special purpose ship

Cable-Layer
Crane Ship
Fire-Fighting Vessel
Fishing Support Vessel
Icebreaker
Power Station Vessel

Tug

Pusher Tug
Tug

Other special activities

Anchor Hoy
Buoy/Lighthouse Vessel
Caprolactam Tanker
Crewboat
Drilling Ship
Edible Oil Tanker
Exhibition Vessel
Hopper Dredger
Hospital Vessel
Kelp Dredger
Launch (Unspecified)
Mining Vessel
Mooring Vessel
Motor Hopper
Offshore Processing Ship
Passenger/Container Ship
Passenger/General Cargo Ship
Patrol Vessel
Pearl Shells Carrier
Pilot Vessel
Pipe Burying Vessel
Pollution Control Vessel
Powder Carrier
Research Vessel
Sail Training Ship
Salvage Ship
Seal-Catcher
Search & Rescue Vessel
Standby-Safety Vessel
Supply Vessel
Tank-Cleaning Vessel
Training Ship
Trans-shipment Vessel

Urea Carrier

Utility Vessel
Vessel (function unknown)
Waste Disposal Vessel
Whale-Catcher
Wood Chips Carrier
Work/Repair Vessel

Other

Dredger
Fishing Vessel
Live-Fish Carrier
Livestock Carrier
Unknown
Vehicles Carrier

Annex IV. List of Statutory Certificates, by conventions

SOLAS (and STCW)

SOLAS/STCW

Minimum safe manning document

SOLAS - ISM

Document of Compliance
Safety Management Certificate

SOLAS - ISPS

International Ship Security Certificate

SOLAS - IMDG

Document of compliance with the special requirements for ships carrying dangerous goods

SOLAS - GC

Certificate of Fitness for the Carriage of Liquefied Gases in Bulk

SOLAS - IGC

International Certificate of Fitness for the Carriage of Liquefied Gases in Bulk

SOLAS - HSC

High-Speed Craft Safety Certificate

SOLAS - MODU

Mobile Offshore Drilling Unit Safety Certificate

SOLAS - SPS

Special Purpose Ship Safety Certificate

SOLAS - PSSC

Passenger Ship Safety Certificate, including Record of Equipment

SOLAS/CSS

Cargo Ship Safety Certificate, including Record of Equipment
Cargo Ship Safety Equipment Certificate, including Record of Equipment
Cargo Ship Safety Construction Certificate
Cargo Ship Safety Radio Certificate, including Record of Equipment

SOLAS/CSR

Continuous Synopsis Record

SOLAS/INF

International Certificate of Fitness for the Carriage of Cargo

MARPOL

MARPOL - IAPP

International Air Pollution Prevention Certificate

MARPOL - IOPP

International Oil Pollution Prevention Certificate

MARPOL - ISPP

International Sewage Pollution Prevention Certificate

MARPOL - EIAPP

Engine International Air Pollution Prevention Certificate

MARPOL - IBC

International Certificate of Fitness for the Carriage of Dangerous Chemicals in Bulk

MARPOL - NLS

International Pollution Prevention Certificate for the Carriage of Noxious Liquid Substances in Bulk

MARPOL BCH

Certificate of Fitness for the Carriage of Dangerous Chemicals in Bulk

MARPOL - CAS

Condition Assessment Scheme Statement of Compliance

Other Conventions

ITC

International Tonnage Certificate

Load Lines

International Load Line Certificate

AFS

International Anti-Fouling System Certificate
Statement of AFS Compliance
Declaration of AFS Compliance

Ballast WM

Ballast Water Management Certificate

CLC

Certificate of insurance or other financial security in respect of civil liability for oil pollution damage

BUNKER

Certificate of insurance or other financial security in respect of civil liability for bunker oil pollution damage

Annex V. Ships in the scope of Trade Association and vetting programs

In Chapter 6, various figures from trade association and vetting programs are compared to a base population of ships of a relevant ship type. This Annex gives the relevant ship types for each trade association and vetting programs

Intertanko

“Gas Tankers”
and “Oil & Chemical Tankers”
(as described in Annex I)

Intercargo

“Bulk Carriers”
and “General Cargo Ships”
(as described in Annex I)

Note that Intercargo deals normally with ships with deadweight over 10,000. This need to be kept in mind when analysing figures of Medium ships associated with Intercargo.

Intermanager

“Bulk Carriers”
“General Cargo Ships”
and “Oil & Chemical Tanker”
(as described in Annex I)

Green Award

A subset of Bulk Carriers:

Aggregates Carrier
Bulk Carrier
Bulk Dry Storage Ship
Cement Carrier
Limestone Carrier
Ore Carrier
Powder Carrier
Refined Sugar Carrier
Self-Discharging Bulk Carrier
Wood Chips Carrier

Gas Tankers:

CO2 Tanker
LNG Tanker
LPG Tanker

Oil & Chemical Tankers:

Chemical Tanker
Chemical/Oil Products Tanker
Crude Oil Tanker
Oil Products Tanker

CDI

The following Tankers:

Chemical Tanker
Chemical/Oil Products Tanker
Vegetable Oil Tanker

OCIMF

“Gas Tankers”
and “Oil & Chemical Tanker”
(as described in Annex I)
